

Ahmad Dimas Abid Muttqi - Software Engineer

Jakarta, Indonesia +6282236421452 ahmaddimas18@gmail.com ahmaddimas ahmaddimas

PROFILE

Backend Developer with 7+ years of experience across e-commerce, insurance, and airline loyalty domains. Delivered secure and production-ready systems including performance tuning to microservices architecture and optimized legacy systems. Experienced with Docker, Kafka, CI/CD pipelines, and modern software development practices. Experienced working in Agile, distributed team environments with a focus on clean code, security, and long-term maintainability

EXPERIENCE

Backend Developer (Freelance)

Kementerian Keuangan Republik Indonesia

Feb 2026 – Present

- Developed and maintained backend services using C# and .NET Core for performance assessment systems.
- Conducted system maintenance and performance optimization to ensure reliability and operational efficiency.

Backend Developer

AXA Mandiri Financial Services

Nov 2023 – Apr 2026

- Led incremental migration of existing services to Red Hat OpenShift, progressively moving workloads from on-premise to cloud infrastructure.
- Remediate security vulnerabilities identified by pentesters before each monthly deployment, consistently achieving clean release sign-offs.
- Set up ELK Stack (Elasticsearch, Logstash, Kibana) with APM integration for centralized logging and tracing.
- Initiated a microservices migration from a monolith by implementing new features as independent services using Docker and CI/CD pipelines (strangler pattern).
- Improved legacy codebase quality by integrating JUnit/Mockito test suites, increasing code coverage from below 30% to 80%+.

Full-Stack Developer

Lime Commerce

Jun 2020 – Nov 2023

- Migrated a production Magento 1 store to Magento 2, managing data migration, custom extension porting, and improved Google PageSpeed score from below 35 to 90+ through image delivery optimization, and frontend asset reduction.
- Built and customized 10+ Magento 2 extensions across the full e-commerce stack – catalog, checkout, customer management, and UI/SEO – both from scratch and by heavily modifying third-party modules to meet client requirements.
- Managed Linux server infrastructure, handling deployments and production website maintenance.

Backend Developer

DOT Indonesia

Jul 2019 – Apr 2020

- Built RESTful APIs for a real estate platform using Laravel and Laravel Nova, integrated with frontend teams via a DevOps-managed CI/CD pipeline.

Software Engineer

PT. Aero Systems Indonesia

Jul 2018 – Jul 2019

- Delivered AMALA Loyalty Management System for Garuda Indonesia and Citilink using Java Spring Boot
- Integrated Apache Camel for enterprise workflows
- Deployed services using Docker and Kubernetes for scalability

SKILLS

Languages: Java · PHP · JavaScript · C#

Frameworks & Platforms: Spring Boot · Spring Cloud Gateway · Laravel · Apache Camel · Magento 2

Databases: MySQL · PostgreSQL · SQL Server

Infrastructure: Docker · Linux · CI/CD · Git

Observability & Messaging: ELK Stack · APM · Kafka

Practices: Microservices Architecture · REST API Design · Unit Testing · Agile/Scrum · OWASP Security Remediation

EDUCATION

Bachelor's Degree, Computer Science

Bina Nusantara University

2019 – 2023

LANGUAGES

Bahasa Indonesia: Native | English: Upper Intermediate (B2)
